

Rare Disease Day - February 28th, 2019

- 1) Download the BCMFF flyers [here](#);
 - 2) Go to a local children hospital on February 28th at the Ophthalmology Department;
 - 3) Give BCMFF flyers to Clinicians and take a picture;
 - 4) Post your pictures [here](#).
-

Get involved in 2019 Rare Disease Day!

Rare Disease Day takes place on **the last day of February each year**. The main objective of Rare Disease Day is to **raise awareness** amongst the general public and decision-makers about **rare diseases and their impact on patients' lives**.

[Find Out More](#)

What will BCMFF do during RDD?

Our event during RDD will focus on spread **awareness** on our condition. We all know that because of the fact that BCM is a rare genetic disease, most clinicians do not know enough about it, which leads to a long time between detecting symptoms and determining a correct **diagnosis**.

Although we are rare, we still have the power to help change all of this. That is why, on the 28th of February we invite you all to **reach your local hospital** where an Ophtalmology Unit can be found and bring with you our **RDD Flyers**, handing them over to a Clinician.

We also invite you to take a picture with the Clinician you meet and post it on our [Facebook page](#).

We will then upload it to the Rare Disease Projects Page.

The best picture will win one of our bags, with a cap and bracelets, so **be creative!**

You can download the flyers by clicking on the button below.

If each one of us would reach 1 hospital, this would mean reaching 300 hospitals around the world in one day, so please

JOIN OUR EVENT!

Best picture will receive a prize!
