## February 28th 2022 marks the fifteenth Rare Disease Day

Dear BCM Families,

Rare Disease Day takes place on the last day of February each year. The main objective of Rare Disease Day is to raise awareness among the general public and decision-makers about rare diseases and their impact on patients' lives.

Our event during 2022 Rare Disease Day will focus on spreading awareness on our condition.

We all know that, because of the fact that BCM is a rare genetic disease, most clinicians do not know enough about it, which leads to a long time between detecting symptoms and determining a correct **diagnosis**.

Please visit the website hereunder, and follow the instructions!!!

THANK YOU ALL
